

# **GREENWOOD VILLAGE COMMUNITY ASSOCIATION, INC.**

## **RULES FOR MARSHALL LAKE**

Marshall Lake is a man-made two acre lake located next to the Greenwood Clubhouse. The lake is 7' deep at its deepest point and is regularly maintained to keep it free of algae. GVCA stocks the lake with a variety of fish, including rainbow trout, large mouth bass, sunfish, bluegill, crappie, channel catfish, and amurs. Broadhead minnows and shiners are stocked as a food source for the other fish.

### **Rules for Marshall Lake**

1. All residents using the lake area must have a Greenwood Activity Pass. Guests must be accompanied by a resident when fishing and are only allowed to catch and release.
2. Fishing hours are dawn to dusk.
3. All fishing hooks, lines, bait boxes, and other trash must be disposed of in the trash containers by the lake.
4. No watercraft or persons are allowed on or in the lake.
5. No ice skating, no ice fishing, and no other activities on the ice are allowed.
6. Battery-powered or wind-powered model boats are allowed on the lake, but gas engine powered model boats are not allowed.
7. Please keep and eat any rainbow trout you catch, they typically do not live through the summer heat.
8. Catching and/or keeping the amur (giant carp) is prohibited, they keep the lake clean of vegetation and algae. Using bread, corn, or any plant-based bait is prohibited.
9. Bass and channel catfish are catch and release only.
10. You are allowed to catch and eat rainbow trout, sunfish, bluegill, or crappie. There is a three fish limit per day per resident. Please quickly release any fish you catch that you do not intend to eat.
11. If you catch any species other than 8 stocked species, do not return them to the lake. Dispose of them properly if you do not wish to keep them.
12. Do not use live bait fish, such as minnows, and do not add any new fish to the lake. The lake is professionally maintained, and the introduction of other fish can upset the balance of the lake and introduce diseases that could kill the fish.
13. Do not clean fish on GVCA property.
14. Dogs are allowed to swim in the lake, but only when no residents or guests are fishing in the lake. Your dog must be under your control at all times, and must be on a leash when not in the water. Please do not let your wet dog shake near other residents. (Dogs are allowed to swim because they encourage the waterfowl to continue their migration rather than stay and make a mess on the lawn.)
