CONSTRUCTION NOTICE

Dear Resident:

Terrace Construction will begin replacement of the water main on Canyon View Lane the week of March 30, 2020.

Construction crews will work on your street unloading pipe and fittings, cutting and grinding pavement, and digging trenches, among other construction activities. As with any construction project there are invariably certain inconveniences. We will make every effort to keep these inconveniences to a minimum.

OF SPECIAL CONCERN

The installation of a temporary above ground water main will service all households while the old main is being replaced. **Please be careful when you drive next to temporary hydrants and house connections.** These appurtenances can damage vehicles and result in rupture to the temporary piping system and loss of water to the neighborhood. In order to isolate your house from the existing main it may be necessary for Terrace Construction Company personnel to enter your house to shut off the service line at the meter. These personnel will be able to show proper identification. Please ask for it before allowing anyone access to your home for this purpose. Please note an adult must be present for our personnel to enter your home. We will be able to connect the bypass to most homes from the outside of the property, so no one will need to enter your home.

YOUR SAFETY IS OUR CONCERN

We urge you to observe all traffic barricades, warning lights and flag personnel. These control devices and personnel are there for your protection. For everyone's safety we ask that no cars be parked on the street during construction hours. Normal parking will be permitted after construction hours. Above all, **please warn children to keep a safe distance from all equipment and excavations.** Construction equipment is fascinating to children, but can be very dangerous even while not in operation.

On similar jobs of this nature, Terrace Construction Company has experienced some vandalism to its property. We ask your cooperation in reporting any incidents of damage or loss of property to **Mr. Rik Luzader** of Terrace Construction Company at **216. 739. 3170, ext. 223.**

If a special problem arises, please call our office number, **216. 739. 3170**, between 7 am and 6 pm. From 6 pm to 7 am call **216. 861. 8663.**

During the project it will become necessary to shut the water off for a short duration. You will be contacted before any scheduled water service outages.
